Core Composition: Approx. 55% limestone powder; approx. 30% polyvinyl chloride; approx. 5% polyurethane foaming agent, approx. 5% stabilizer and fillers

Contaminates: Non-toxic and contains NO formaldehyde

STC Rating: 52 dB
 IIC Rating: 57 dB

- Lifetime structural warranty • Lifetime moisture warranty
- 50 years residential warranty • 15 years commercial warranty

Overview

50 Year Residential warranty and 15 year commercial warranty. We can offer this warranty due to our ABA format. While most SPC or “rigid cores” are an overlay, meaning there is no vinyl, they are just laminating the top of the core, SLCC is going a different direction. At SLCC, we are doubling down on the vinyl for a stronger more stable product. The “A” is a layer of vinyl. The “B” is the SPC core. Then the “A” is another layer of vinyl then we attach the pad. Most SPC’s are brittle, ours is not. You can bend one of our 7” x 48” boards in this collection and it will not break.

Our PVC film is German grade and the most realistic in the market. The visuals are crystal clear and give it a unique realistic look.
